

Note: All Questions are Compulsory.

Q.1 Answer the Following. (Any Two)

10 M

1. What is the need of object oriented programming language?
2. What is mean by encapsulation? How it can be achieved?
3. Explain Inheritance and Polymorphism with difference between them.
4. Explain the concept of class and object with proper example.

Q.2 Answer the Following. (Any Two)

10 M

1. What are constructor? Explain with proper example.
2. Write a C++ program to show the use of pointers to object.
3. How memory can be allocated for objects?
4. Write a C++ program

Q.3 Answer the Following. (Any Two)

10 M

1. Write a C++ program to overload increment operator.
2. What are the rules for operator overloading
3. How we can overload conversion operator? Explain with example.
4. Explain "this" pointer with proper example.

Q.4 Answer the Following. (Any Two)

10 M

1. Explain how polymorphism can be achieved at compile time and run time?
2. What are multiple inheritance and multilevel inheritance?
3. What is an abstract class? Give the proper programming example.
4. What are the rules for virtual function?

Q.5 Answer the Following. (Any Two)

10 M

1. Write a note on unformatted input function.
2. Write a C++ program to show the use of append operator.
3. Explain copy constructor.
4. What are ios classes?

Q.6 Answer the Following. (Any Two)

10 M

1. Write a note on iterator.
2. Write a program to illustrate the templates in C++
3. Write a note on standard C++ library.
4. Write a note on headers in C++.

Q.7 Answer the Following. (Any Three)

15 M

1. How we can use string stream class? Explain with proper example.
2. Write a C++ program to print cube of a number using friend function.
3. What are the file operators available for error handling?
4. What are the applications of OOP?
5. Write a note on static data members.
6. What are virtual functions?
