

- N. B.: (1) Question **No. 1** is **compulsory**.
 (2) Attempt **any four** from Question-Nos. **2 to 7**.
 (3) **Make** suitable **assumptions** wherever necessary and **state** the **assumptions** made.
 (4) **Answers** to the **same question** must be written **together**.
 (5) **Numbers** to the **right indicate marks**.
 (6) **Draw** neat **labeled diagrams** wherever **necessary**.

1. a) Explain different types of arrays in visual basic with one example each. 5
 b) Explain the purpose of ListIndex property and ListCount property. 5
 c) What is constant? Explain named constant and intrinsic constants. 5
 d) What is OOP? Explain Object, Event and Properties with example. 5
2. a) Explain For/Each loop with example. 6
 b) Explain the following controls: 6
 (i) CheckBox (ii) CommandButton
 c) Create an application having 3 horizontal scrollbars—Red, Green and Blue. 8
 The maximum value of any scrollbar should be 255. The application should also
 contain a picture box, whenever the value of any scrollbar is changed, the color
 corresponding to the combination of three values of 3 scrollbars should be
 applied to the PictureBox's background.
3. a) Give an example of three message box constants. 6
 b) Explain Open and Font dialog boxes. 6
 c) Implement the following functionalities for a ListBox control. 8
 Adding item, Removing selected item, Count selected items and Clear the list of
 items and finally close the application. Use TextBox control to take item as an
 input and display output.
4. a) Explain the difference between sub procedure and function procedure. 6
 b) Explain Left(), Right() and Mid() functions with a string. 6
 c) Create a visual basic project, which allows user to change the font name, size, 8
 color and properties like BOLD, Italic of the text available in a textbox. Use
 common dialog box control.
5. a) What is flow control? Explain Select...Case statement with suitable. 6
 b) What are the differences between random file and sequential file? 6
 c) List Create an application having two combo boxes for different countries and 8
 their currencies. Display "Right selection:..." message if selected combination is
 correct otherwise display "Wrong combination...! Try again". Use command
 button to display message.

6. a) List and explain the various types of datatypes supported by Visual Basic. 6
- b) What is recordset? Write the code to check for empty Recordset. Display a message box if the recordset is empty. 6
- c) Write the output for the following code : 8
- (i) `Format(123456.57, "0")`
 - (ii) `Format(123456.57, "0.0")`
 - (iii) `Format(123456.576, "0.00")`
 - (iv) `Format(123456.576, "00.00")`
 - (v) `Format(123456.576, "#,##0.00")`
 - (vi) `Format(123456.576, "$#,##0.00")`
 - (vii) `Format(0.567, "0%")`
 - (viii) `Format(0.5988, "0.00%")`
7. a) Write short note on: 6
- (i) AbsolutePosition Property
 - (ii) Bookmark property
- b) Explain the following methods and properties of ListBox control : 6
- (i) `AddItem()`
 - (ii) `Clear()`
 - (iii) `RemoveItem()`
- c) Write a visual basic application to compute examination grades based on the percentage of marks of three subjects. Read marks of 3 subjects using three text boxes and show grade when user clicks a command button. Use following criteria to calculate grade: 8
- | Marks | Grade |
|-----------|--------------|
| ≥ 75 | Distinction |
| ≥ 60 | First Class |
| ≥ 50 | Second Class |
| ≥ 40 | Pass Class |
| Otherwise | Fail |
